**STONE ISLAND
GARDEN OF
EDEL REFLECTIVE
JACKET**

Stone Island has a reputation for innovative fabrics, and the research has led to the development of garments using reflective materials. Here, the iconic Stone Island jacket has been printed with a mesh containing thousands of reflective glass microspheres. The garment is also coated with the top of the Stone Island 'Pixel Reflective Jacket' giving the jacket the ability to bounce back light from any angle, creating a shimmering effect. Finally, a 1000th of an inch of the jacket is the size of a pin, meaning water won't bead on the jacket's surface, running off rather than penetrating the fabric. £1000 at Stone Island.

The jacket features a reflective mesh and is windproof, proof on the left.
