

Hurst Barn

A grade 2 barn in West Sussex, Hurst Barn was built in the 1500s and was originally a cart barn. A minstrels gallery and oak wooden floorboards were installed when the barn was converted. The high vaulted ceiling still features the original beams. French doors are now in place at the front and, with the addition of several windows, there is plenty of light. The area of the barn is approx 12.46 x 5.94 m. With the high vaulted ceiling, the barn remains as a single large open room. With wonderful sound acoustics and good accesibility, this location would be particularly suited for TV and film shoot. Situated 20 miles north of Brighton , just off A23. Local train station takes 45 mins into London Victoria. There is plenty of parking on gravel drive to front.
